

# FPL: Annual Consumption Homeowner Assist

Go to <https://www.fpl.com/>

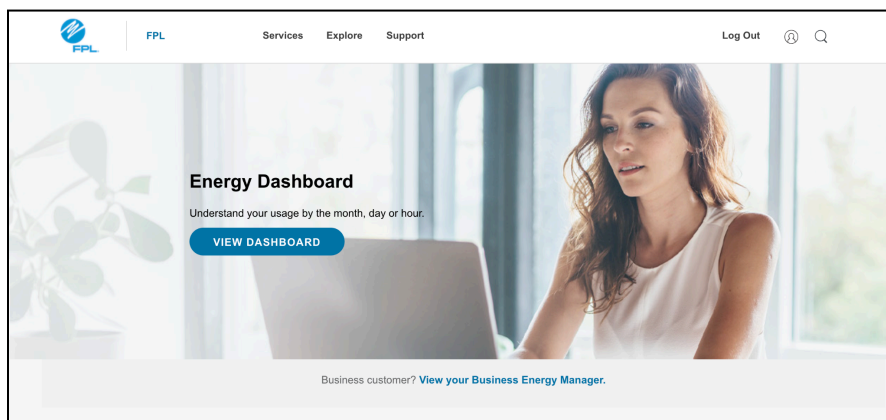

1. Once on home page input your credentials, and click “**Log In**”

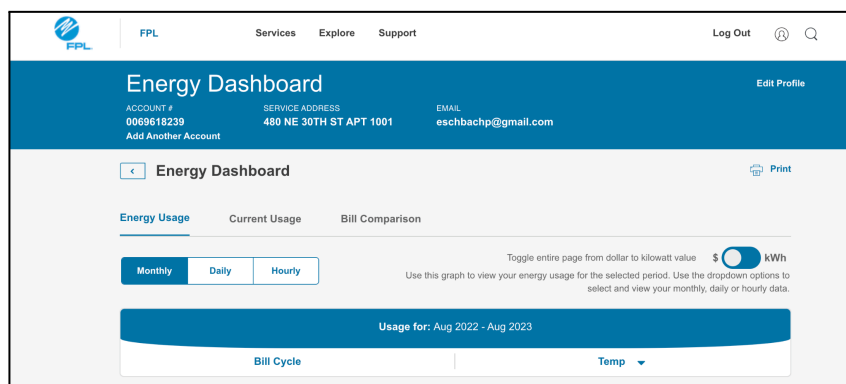

2. Once logged in you should see a page that looks like this

3. Click on the **“Explore”** tab and from the dropdown click **“Understand My Usage”**

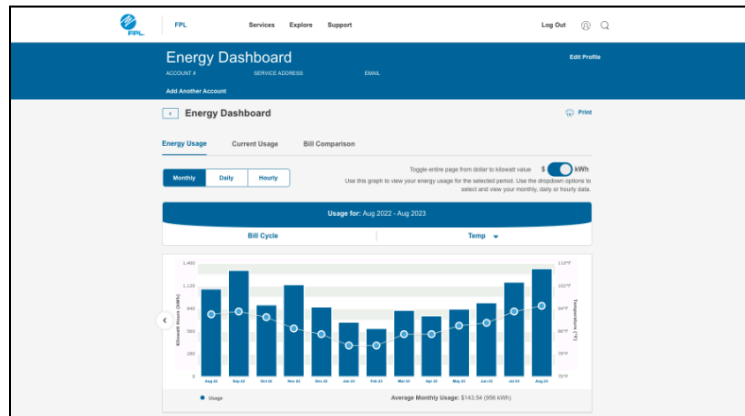

4. Click the **“View Dashboard”** link and it will take you to the page below, it is defaulted to show the past years bill cycles.

5. Switch the selection from **Cost (\$)** to **kWh**.

6. Scroll down and you will see a graph of the past 12 months of your home's consumption.

This page only offers a monthly average right below the graph, but multiplying the average by 12 will give a good estimate of of the average yearly consumption

In this example the average monthly consumption is 956 kWh so the yearly average is 11,472 kWh

***At Solar First this alone helps tremendously for us to understand your home's usage, and equips us with the knowledge to create and design a system that makes sense for your household. Thank you!***
